How could laser take your dental practice to next level?

Alshaimaa Alnaggar

RWTH Aachen University, Germany
Private Clinic in Bahrain, Bahrain

Abstract

Laser become important tool in daily dental practice, with the advances and different wavelengths, it become a big value and more satisfying to patients, as you will offer painless, fast, less bleeding and marvellous results.

In this presentation I will show new advances in dental lasers techniques, many of my clinical cases before and after in routine daily dental treatments.

I will show results of laser assisted cosmatic dentistry, different wavelengths can be used in same treatment and different results with mention advantage and disadvantage, indications and contraindications.
