

Rejuvenating Adult Smiles: Clinical application of innovations in Dentistry

Kim Ross
Medical University of South Carolina, USA

Abstract

Restoring Adult Dentition, meaning correcting malaligned teeth, gingival recession and collapsed occlusion by utilizing combination and multidisciplinary in dentistry; 3D imaging, Envisaging, small body implants, less Invasive gum grafts and crowns.

With the increased Global awareness on health (oral and systemic) and wellness, treating the maturing population with noninvasive treatments to restore Oral health.

The underlying premise being dental health is the origin of digestion and physical wellness. Teeth that fit together work better longer (function digestion).

Dr Ross will present clinical applications for restoring adult smiles:

Clinical Case:

1. invisalign, implants and crowns
2. invisalign, tarow gum graft and veneer
3. small body implants and partial denture
